## REPRODUCTION TARGET

Use version: Minecraft 14w06b

Affected versions (41):

Minecraft 14w06b

20w51a

21w03a

1.16.5

21w05a

21w05b

21w06a

21w07a

21w08a

21w08b

21w10a

21w11a

21w13a

21w14a

21w15a

21w16a

21w17a

21w18a

1.17

1.17.1

21w40a

21w41a

21w42a

1.18 Pre-release 1

1.18

1.18.1

22w03a

22w05a

1.18.2 Release Candidate 1

1.18.2

22w16b

22w17a

1.19

1.19.1

1.19.2

22w43a

1.19.3

1.19.4

1.20

1.20.1

23w31a

Environment:

Minecraft Java Edition snapshot 14w06b, using an unmodified client in a single-player Creative-mode world with cheats enabled so the unobtainable Barrier item can be acquired with a version-compatible command.

## PRECONDITIONS

---

- Install and launch the exact Java Edition snapshot 14w06b, preferably from a separate launcher installation/profile so its historical settings and world files are isolated from newer versions.
- Use the normal Minecraft resource pack and no client mods, shaders, or optimization modifications that alter particle rendering.
- A keyboard and mouse are available. The instructions name the default controls; use the equivalent bound control if keys have been reassigned.
- No particular seed, biome, structure, coordinates, difficulty, or world type are specified by the report.

## STEPS TO REPRODUCE

### 1 REPORT

In the Minecraft Launcher, select the installation for snapshot 14w06b and start the game. Do not substitute the listed fix version 23w40a.

INPUT 14w06b

SUCCESS CUE The 14w06b title screen is displayed and the version text identifies the running snapshot as 14w06b.

### 2 INFERRED

Select Singleplayer, choose Create New World, set Game Mode to Creative, open More World Options, ensure Allow Cheats is ON, and create the world. Using a new world is a deterministic way to establish the Creative-mode condition; the report does not require a specific existing world.

INPUT

Singleplayer -> Create New World -> Game Mode: Creative -> More World Options... -> Allow Cheats: ON -> Create New World

SUCCESS CUE The player has entered a world in Creative mode and commands are permitted.

### 3 INFERRED

Wait without opening menus until nearby terrain has rendered and movement responds normally.

SUCCESS CUE Solid ground is visible nearby, chunks are no longer visibly appearing around the player, and movement responds normally.

### 4 VERIFIED

Open the pause menu with the default pause control.

INPUT Esc

SUCCESS CUE The Game menu is open.

### 5 VERIFIED

Open the general options screen.

INPUT Options...

SUCCESS CUE The Options screen is displayed.

### 6 REPORT

Open the video settings screen.

INPUT Video Settings...

SUCCESS CUE The Video Settings screen is displayed and contains the Particles setting.

### 7 REPORT

Click the Particles button repeatedly until its displayed value is Minimal. Stop as soon as it reads Minimal; do not leave it on All or Decreased.

INPUT Particles: Minimal

SUCCESS CUE The button on the Video Settings screen visibly reads "Particles: Minimal".

**8** **INFERRED**

Use Done to leave Video Settings, use Done again to leave Options, and select Back to Game if the pause menu remains open.

INPUT Done -> Done -> Back to Game

SUCCESS CUE Gameplay has resumed with the Particles option still set to Minimal.

**9** **INFERRED**

Open the in-game chat input using the default chat control. The next command must be executed in in-game chat, not in a server console.

INPUT T

SUCCESS CUE The chat input line is open at the bottom of the screen.

**10** **VERIFIED**

Type the exact 14w06b-compatible give command, including its leading slash, and press Enter. This supplies one Barrier because the Barrier is not normally selected from the historical Creative inventory.

INPUT /give @p minecraft:barrier 1

SUCCESS CUE The command is accepted and a Barrier item appears in the player's inventory, normally in the first available hotbar slot.

**11** **INFERRED**

If the Barrier did not enter the hotbar automatically, press E to open the inventory, locate the Barrier item, and move it into any hotbar slot. The hotbar is the row of nine item slots displayed along the bottom of the gameplay screen. Close the inventory with E after moving the item.

INPUT E

SUCCESS CUE A Barrier item is present in one of the nine hotbar slots and normal gameplay view is restored.

**12** **VERIFIED**

Select the hotbar slot containing the Barrier by pressing that slot's number key, 1 through 9, or by scrolling until the slot is highlighted. Keep this item selected for the rest of the reproduction; barrier visibility in this snapshot is activated while a Creative-mode player holds a Barrier.

INPUT 1-9, matching the Barrier's hotbar slot

SUCCESS CUE The Barrier slot has the hotbar selection highlight and the Barrier item is the player's actively held item.

**13** **INFERRED**

Move to an exposed solid ground block with an empty air block directly above it. Remain close enough to place a block on its top face without changing the active hotbar slot.

INPUT W/A/S/D as needed

SUCCESS CUE The player is standing within placement reach of a visible solid ground block, and the air immediately above that block is unobstructed.

**14** **INFERRED**

Aim the crosshair at the top face of the chosen solid ground block. Keep the Barrier selected and do not aim at grass, a flower, an entity, or another interactable object that could consume the click.

INPUT **Mouse movement**

**SUCCESS CUE** The crosshair is centered on the top face of the chosen ground block and the Barrier remains selected.

**15** **REPORT** **TRIGGER**

Right-click once to place one Barrier in the air block immediately above the targeted ground block. After clicking, do not scroll the mouse wheel, press another hotbar number, open the inventory, or move far away; continue actively holding the Barrier.

INPUT **Right-click once**

**SUCCESS CUE** The placement action has just been performed at the targeted block space, the Barrier remains selected in the active hotbar slot, and the player remains directly beside the placement location.

## HANDOFF TO OBSERVATION

---

The player has just manually placed a Barrier on top of the selected ground block in Creative mode, the Video Settings particle level remains Minimal, the Barrier item remains selected in the active hotbar slot, and the player remains beside and facing the placement location. Begin particle-rendering observation now without changing the held item or graphics settings.

## UNCERTAINTIES

---

- The report provides no seed, coordinates, world type, or required terrain, so the plan uses an arbitrary newly generated world and the first convenient exposed solid ground block.
- The report does not specify how to obtain the Barrier item. The plan uses the version-compatible command `/give @p minecraft:barrier 1`` because Barrier is not normally obtained from the historical Creative inventory.
- The report says to switch into Creative mode but does not indicate that a transition from another game mode is itself required. The plan creates the test world directly in Creative mode to minimize unrelated actions.
- Barrier placement produces an invisible solid block, and the success cue deliberately does not use the presence or absence of its red particle icon because evaluating that rendering is the responsibility of the observation subsystem.

MANUAL RESULT

|                  |                    |
|------------------|--------------------|
| Version used     |                    |
| Reproduced?      | YES / NO / PARTIAL |
| Trigger reached? | YES / NO           |
| Crash file       |                    |
| Notes            |                    |
