

Naturally-generated seagrass and kelp destroys ice

MC-129888 WORLD GENERATION

Status	Resolved / Fixed
Affected	Minecraft 18w20c; Minecraft 18w21a; Minecraft 18w21b; Minecraft 18w22a; Minecraft 18w22b; Minecraft 18w22c; Minecraft 1.13-pre1; Minecraft 1.13-pre2; Minecraft 1.13-pre3; Minecraft 1.13-pre6; Minecraft 1.13; Minecraft 18w30b; Minecraft 1.13.1; Minecraft 1.13.2; Minecraft 18w48a; Minecraft 18w48b (+more)
Fixed in	24w44a
Reported	2018-05-18
Mojira category	World generation

REPRODUCTION TARGET

Use version: Minecraft 18w20c

Affected versions (58):

Minecraft 18w20c

Minecraft 18w21a

Minecraft 18w21b

Minecraft 18w22a

Minecraft 18w22b

Minecraft 18w22c

Minecraft 1.13-pre1

Minecraft 1.13-pre2

Minecraft 1.13-pre3

Minecraft 1.13-pre6

Minecraft 1.13

Minecraft 18w30b

Minecraft 1.13.1

Minecraft 1.13.2

Minecraft 18w48a

Minecraft 18w48b

Minecraft 18w49a

Minecraft 18w50a

Minecraft 19w02a

Minecraft 19w03a

Minecraft 19w04b

Minecraft 19w05a

Minecraft 19w06a

Minecraft 19w07a

Minecraft 19w11b

Minecraft 19w12b

Minecraft 19w13b

Minecraft 19w14a

Minecraft 19w14b

Minecraft 1.14 Pre-Release 1

Minecraft 1.14

Minecraft 1.14.3

1.14.4

1.15 Pre-release 1

1.15.1

1.15.2

1.16.3

1.16.4

20w46a

20w51a

21w03a

21w05b

21w06a

21w44a

1.18.1

1.19

1.19.3

1.20.2

23w43b

23w45a

1.20.3 Pre-Release 2

1.20.3

1.20.4 Release Candidate 1

1.20.4

1.20.5

1.20.6

1.21

1.21.3

Environment:

Vanilla Minecraft: Java Edition 18w20c in a new single-player Default-type world. Use Creative mode with commands enabled so the report-provided teleport command can be executed safely. Keep the world in 18w20c for the entire reproduction and do not pre-generate, edit, replace, break, or place blocks in the target area.

PRECONDITIONS

- Install or select the historical Java Edition snapshot Minecraft 18w20c in the Minecraft Launcher.
- Use a newly created world rather than a world generated or opened in another Minecraft version.
- Use the report-supported seed -3663419213315141181, supplied in the early reporter comment associated with the original report.
- Set the world type to Default; do not use Superflat, Buffet, Customized, or another alternate generator.
- Use Creative mode and enable commands/cheats.
- Before the teleport, do not manually travel to or otherwise load the area around X=1568, Z=-1184.
- Do not use the fix version 24w44a for this reproduction.

STEPS TO REPRODUCE

1 REPORT

In the Minecraft Launcher, configure or select an installation whose version is exactly Minecraft Java Edition snapshot 18w20c, then launch it.

INPUT 18w20c

SUCCESS CUE The Minecraft title screen is open and identifies the running version as 18w20c.

2 INFERRED

From the title screen, select Singleplayer, then select Create New World.

SUCCESS CUE The Create New World configuration screen is open.

3 INFERRED

Set Game Mode to Creative. Ensure Allow Cheats or Allow Commands is ON so an in-game teleport command can be used.

SUCCESS CUE The new world is configured for Creative mode and commands are enabled.

4 REPORT

Open More World Options, enter the report-supported world seed exactly as shown, and leave World Type set to Default.

INPUT -3663419213315141181

SUCCESS CUE The seed field contains -3663419213315141181 and the selected generator is Default.

5 INFERRED

Select Create New World to generate and enter the world.

SUCCESS CUE The player has spawned in the newly generated world in Creative mode.

6 INFERRED

Wait at the spawn location without traveling toward the target coordinates. Continue only after nearby terrain has rendered and normal movement responds without world-loading pauses.

SUCCESS CUE Spawn-area chunks are rendered, controls respond normally, and the distant target area has not been visited manually.

7 INFERRED

Press T, using the default Open Chat control, to open the in-game chat input.

INPUT T

SUCCESS CUE The chat input field is visible and ready to accept a command.

8 REPORT TRIGGER

Enter the report-provided teleport command exactly, including the leading slash and the relative Y coordinate represented by ~, then press Enter. The command teleports the executing player to X=1568 and Z=-1184 while retaining the player's current Y coordinate; loading the distant target chunks is the world-generation trigger.

INPUT /tp @s 1568 ~ -1184

SUCCESS CUE The command is accepted and the player is teleported to the area around X=1568, Z=-1184.

9 **INFERRED**

Do not move, place blocks, or break blocks while the destination terrain loads. Wait until the surrounding destination chunks have rendered and movement and camera controls respond normally.

SUCCESS CUE The target-area terrain is fully visible, no loading screen or major chunk-loading pause remains, and the player remains near X=1568, Z=-1184.

10 **INFERRED**

If the retained Y coordinate leaves the camera underwater, inside terrain, or otherwise obstructed, double-tap Space to begin Creative flight and hold Space only until the nearby ice-covered water surface can be viewed clearly; then release Space. Do not break or place any blocks and remain near the supplied X and Z coordinates.

INPUT Space, Space; then hold Space as needed

SUCCESS CUE The player has an unobstructed view of the naturally generated ice-covered water terrain near X=1568, Z=-1184, with the generated blocks left untouched.

HANDOFF TO OBSERVATION

The newly generated destination chunks around X=1568, Z=-1184 have finished rendering in Minecraft Java Edition 18w20c, and the player has a clear view of the naturally generated ice-covered water terrain without having modified any blocks. Hand control to the observation subsystem now.

UNCERTAINTIES

- The report's current formal How to reproduce section is explicitly for version 1.21 and uses seed -953538683905638291 with different coordinates. Because the required recommended version is the first listed affected version, Minecraft 18w20c, this plan instead uses seed -3663419213315141181 and /tp @s 1568 ~ -1184 from the early reporter comment associated with the original 2018 report.
- The comment providing seed -3663419213315141181 and coordinates X=1568, Z=-1184 does not explicitly label its Minecraft version. Its timing immediately after the original 18w20c-era report supports using it for the earliest affected version, but the version-to-seed pairing is not stated outright.
- A later comment reports that X=1568, Z=-1184 led to land in version 1.13.1 and supplies X=1709, Y=64, Z=-1210 for that later version. This does not establish that the original coordinates fail in 18w20c, so the original coordinate command is preserved for the recommended version.
- The report command uses ~ for Y, so the arrival altitude depends on the player's spawn altitude. Creative flight is included only as a non-destructive way to obtain a clear view if that retained altitude obstructs the target surface.
- If no ice-covered water terrain is visible near the supplied coordinates after all destination chunks finish loading, stop rather than exploring randomly; that would indicate that the unlabeled seed-and-coordinate pair is not deterministic for 18w20c.
