REPRODUCTION TARGET

Use version: Minecraft 1.11.2

Affected versions (23):

Minecraft 1.11.2

Minecraft 17w15a

Minecraft 17w16a

Minecraft 1.12.2

Minecraft 1.13-pre5

1.15.1

1.15.2

20w10a

1.16.3

20w51a

21w03a

1.16.5

21w05b

21w06a

21w08b

1.17 Pre-release 3

1.17.1

1.18.1

1.18.2

22w19a

1.19.2

1.20.1

1.21

Environment:

Unmodified Minecraft Java Edition 1.11.2 in single-player on the integrated server. Use a fresh Creative-mode world with cheats enabled, difficulty set to Easy, nighttime, and the default mobGriefing=true gamerule. A Superflat world is selected as a practical convenience so the target zombie and dropped item are easy to see. Default keyboard and mouse controls are assumed.

PRECONDITIONS

- Launch exactly Minecraft Java Edition 1.11.2, the first version listed as affected.
- Use a fresh world so that unrelated entities and changed gamerules do not interfere with the test.
- Cheats must be enabled because the report's reproduction uses the `/summon` command.
- Difficulty must not be Peaceful, because the summoned zombie must remain present.
- Leave the `mobGriefing` gamerule at its fresh-world default value of `true`.
- Perform the test at night so the zombie does not ignite in direct sunlight.
- Do not add the byte suffix `b` to the `CanPickUpLoot` value in the target summon command; the target command must contain exactly `CanPickUpLoot:1`.

STEPS TO REPRODUCE

1 REPORT

In the Minecraft Launcher, create or select an installation that uses release 1.11.2, start it, and verify that the title screen identifies the running version as Minecraft 1.11.2.

SUCCESS CUE The Minecraft 1.11.2 main menu is displayed.

2 INFERRED

Select Singleplayer, then select Create New World to open the world-creation screen.

SUCCESS CUE The Create New World configuration screen is open.

3 INFERRED

Set Game Mode to Creative. Open More World Options, set Allow Cheats to ON, and cycle World Type to Superflat. Return to the main world-creation screen after configuring those options.

SUCCESS CUE The new world is configured for Creative mode with cheats enabled and the Superflat world type selected.

4 INFERRED

Select Create New World. After the world opens, wait until the terrain has rendered and movement and inventory input respond normally.

SUCCESS CUE The player can move normally in a fully loaded Creative-mode world.

5 INFERRED

Set the difficulty to Easy so the zombie will not be removed as it would be on Peaceful. Press T to open chat, enter the command exactly as shown including the leading slash, and press Enter.

INPUT `/difficulty easy`

SUCCESS CUE Chat confirms that the difficulty was changed to Easy.

6 INFERRED

Prevent the target zombie from burning in daylight. Press T, enter the command exactly as shown including the leading slash, and press Enter.

INPUT `/time set night`

SUCCESS CUE The world is visibly at night and the sky is dark.

7 INFERRED

Obtain one Diamond Sword as a clear equippable test item. Press E to open the Creative inventory, open the Search Items tab identified by the compass icon, search for Diamond Sword, and click or drag a Diamond Sword into an empty hotbar slot. The hotbar is the row of nine slots along the bottom of the inventory. Close the inventory with E or Esc.

INPUT `E; search text: Diamond Sword`

SUCCESS CUE A Diamond Sword is present in one of the nine hotbar slots and the inventory screen is closed.

8 INFERRED

Select the hotbar slot containing the Diamond Sword by pressing that slot's number key, 1 through 9, or by scrolling the mouse wheel until the slot is highlighted.

INPUT 1-9 corresponding to the Diamond Sword hotbar slot

SUCCESS CUE The Diamond Sword's hotbar slot is highlighted and the sword is visible in the player's hand.

9 REPORT

Summon the target zombie using the report's command. Press T to open chat, type the command exactly as shown including the leading slash, and press Enter. Preserve the capitalization of CanPickUpLoot and use the unsuffixed value 1; do not change it to 1b.

INPUT /summon zombie ~ ~ ~ {CanPickUpLoot:1}

SUCCESS CUE One zombie appears at or immediately adjacent to the player's current position, and the submitted command contains CanPickUpLoot:1 rather than CanPickUpLoot:1b.

10 INFERRED

Use the movement controls, normally W, A, S, and D, to separate from the newly summoned zombie without attacking it. Keep the Diamond Sword selected and position the player approximately one to two blocks from that specific zombie.

INPUT W/A/S/D as needed

SUCCESS CUE The target zombie is alive, clearly visible, and approximately one to two blocks in front of the player.

11 INFERRED

Aim toward the target zombie's lower body or feet so that an item dropped forward from the player's active slot will land immediately beside the zombie rather than several blocks away.

INPUT Mouse look

SUCCESS CUE The crosshair is aimed at the ground or lower body directly beside the target zombie, with no wall or obstacle between the player and zombie.

12 REPORT TRIGGER

Press the Drop Selected Item control once—Q by default—to throw the selected Diamond Sword toward the target zombie. Do not press Q repeatedly, attack the zombie, enter another command, or summon a replacement zombie after this action.

INPUT Q

SUCCESS CUE The Diamond Sword has left the player's hotbar and has been thrown to a landing point within immediate item-pickup range of the zombie summoned with CanPickUpLoot:1.

HANDOFF TO OBSERVATION

The Diamond Sword has just been dropped within immediate pickup range of the living zombie summoned by /summon zombie ~ ~ ~ {CanPickUpLoot:1}. Begin observation now without providing additional player input or replacing the target zombie.

UNCERTAINTIES

- The report does not specify a game mode, seed, world type, difficulty, time of day, or test item. Creative mode, a fresh Superflat world, Easy difficulty, nighttime, and a Diamond Sword are practical choices intended to make the supplied reproduction deterministic without changing its NBT condition.
- The report says only to throw an item at the zombie. A Diamond Sword is selected because it is visually distinct, cannot stack, and is an equippable item for a zombie with an empty main hand.
- The command summons the zombie at the player's exact relative coordinates (~ ~ ~), so the zombie may initially overlap the player. The plan therefore includes moving a short distance away before dropping the item.
- The suffixed CanPickUpLoot:1b command mentioned by the report is not executed in this primary reproduction path because the handoff must occur immediately after triggering the unsuffixed test case, before evaluating behavior.
