

Baby polar bear subtitle does not explicitly mention it comes from a baby polar bear

MC-185379 Accessibility

Status	Resolved / Fixed
Affected	1.15.2, 20w21a, 20w22a, 1.16 Pre-release 1, 1.16 Pre-release 2, 1.16 Pre-release 3 (+35 more)
Fixed in	23w51a
Reported	2020-05-23

STEPS TO REPRODUCE

1. Launch Minecraft.
2. Create and enter a Creative world with default settings.
3. Enter and run `/playsound minecraft:entity.polar_bear.ambient_baby master @a``.
4. Observe that the subtitle for the sound does not explicitly identify it as coming from a baby polar bear, instead of displaying "Baby Polar Bear humns".

OBSERVED BEHAVIOUR

Actual behavior

When the command is executed, the baby polar bear sound plays, but its subtitle is displayed as `***Polar Bear humns***`. The subtitle does not indicate that the sound originated from a baby polar bear.

EXPECTED BEHAVIOUR

When the baby polar bear ambient sound is played, the subtitle should explicitly identify its source as a baby polar bear, displaying "Baby Polar Bear humns." This would make the subtitle consistent with other baby-mob subtitles, such as those for baby turtles, rather than using a generic or non-specific polar bear sound description.

ENVIRONMENT

ORIGINAL DESCRIPTION

The bug

This is inconsistent with baby turtles, whose subtitles do actually specify this.

The expected subtitle in this case would be "Baby Polar Bear humns".

How to reproduce
