

Missing subtitles for various sounds

MC-91893 Accessibility

Status	Resolved / Fixed
Affected	Minecraft 15w44b, Minecraft 15w45a, Minecraft 15w46a, Minecraft 15w47c, Minecraft 15w49a, Minecraft 15w50a (+81 more)
Fixed in	20w14a
Reported	2015-10-31

STEPS TO REPRODUCE

1. Launch Minecraft.
2. Create a new Creative world with default settings.
3. Open Options -> Accessibility Settings and enable subtitles.
4. Return to the world and attack an entity to play a player attack sound.
5. Observe that the player attack sound has no corresponding subtitle.

OBSERVED BEHAVIOUR

When the affected sound events are played, the sound is audible but no corresponding entry appears in the subtitles display, even when the **Subtitles** accessibility option is enabled.

The affected events include:

- Player attack sounds:
 - `entity.player.attack.crit`
 - `entity.player.attack.knockback`
 - `entity.player.attack.nodamage`
 - `entity.player.attack.strong`
 - `entity.player.attack.sweep`
 - `entity.player.attack.weak`
- Background music and music-disc playback
 - `entity.horse.land`
 - `block.enchantment\_table.use`
 - `item.bottle.empty`
- Minecart movement
- Footstep sounds for husks, strays, wither skeletons, polar bears, and parrots
 - `entity.parrot.fly`
 - `entity.boat.paddle\_land`
 - `entity.boat.paddle\_water`
 - `block.end\_portal.spawn`
 - `block.end\_portal\_frame.fill`
 - `entity.ender\_eye.death`
 - `entity.fishing\_bobber.retrieve`
 - `entity.player.hurt\_on\_fire`
 - `entity.player.hurt\_drown`
- Underwater ambient sounds
 - `block.pumpkin.carve`
- Conduit and beacon sounds
- Barrel opening and closing

- Composter sounds:
 - ``block.composter.empty``
 - ``block.composter.fill``
 - ``block.composter.fill_success``
 - ``block.composter.ready``
- Loom sounds:
 - ``ui.loom.select_pattern``
 - ``ui.loom.take_result``
- Stonecutter sounds:
 - ``ui.stonecutter.select_recipe``
 - ``ui.stonecutter.take_result``
 - ``ui.cartography_table.take_result``
- Villager workstation sounds:
 - ``entity.villager.work_butcher``
 - ``entity.villager.work_cartographer``
 - ``entity.villager.work_farmer``
 - ``entity.villager.work_fisherman``
 - ``entity.villager.work_fletcher``
 - ``entity.villager.work_leatherworker``
 - ``entity.villager.work_mason``
 - ``entity.villager.work_shepherd``
 - ``entity.villager.work_toolsmith``
 - ``entity.bee.loop_aggressive``

For the affected mob and player footstep events, the sound is played without the generic ``subtitles.block.generic.footsteps`` subtitle. The snow golem idle and small slime jump/squish cases additionally lacked the corresponding sound event at the time reported, so no subtitle could be displayed for those actions.

The unused sound events ``entity.wolf.howl``, block fall events, ``entity.player.breath``, and ``entity.cat.hiss`` have no observable subtitle behavior because they are not played by the game in the reported cases.

EXPECTED BEHAVIOUR

Whenever the affected sound effects play, Minecraft should display an appropriate subtitle identifying the sound, including attack sounds, movement and interaction effects, ambient sounds, music or records, and newer entity, block, and UI sounds. Footstep sounds should use the generic footsteps subtitle where indicated, while each other sound should have a clear corresponding subtitle consistently in the subtitles display.
