

The `fall\_after\_explosion` advancement trigger does not work with TNT anymore

MC-307585 Advancements

Status	Resolved / Fixed
Affected	26.1.2
Fixed in	26.2 Snapshot 7
Reported	2026-04-16

STEPS TO REPRODUCE

1. Launch Minecraft version 1.21.11.
2. Create a world with the custom datapack attached to the bug report.
3. Recreate the TNT contraption shown in the attached video.
4. Use the contraption to launch the player into the air with TNT.
5. Observe that the advancement is granted.
6. Launch Minecraft version 26.1.
7. Create a world with the same custom datapack.
8. Recreate the TNT contraption shown in the attached video.
9. Use the contraption to launch the player into the air with TNT.
10. Observe that the `fall\_after\_explosion` advancement does not trigger in version 26.1, despite triggering in version 1.21.11.

OBSERVED BEHAVIOUR

Actual behavior

In Minecraft 1.21.11, the advancement criterion is granted after the player is launched upward by a TNT explosion and falls at least the configured distance. The same criterion does not grant the advancement in Minecraft 26.1 or later when its `fall\_after\_explosion` `cause` condition specifies an entity of type `minecraft:tnt`.

The issue is specific to TNT explosions:

- A criterion using `minecraft:fall\_after\_explosion` with `cause` set to `minecraft:tnt` remains incomplete in 26.1+ even when the player is launched at least 100 blocks vertically and subsequently falls.
- The equivalent criterion using `minecraft:wind\_charge` continues to work, as demonstrated by the vanilla "Who Needs Rockets?" advancement.
- The same TNT-based advancement definition grants correctly in 1.21.11.

Thus, in 26.1+, TNT is no longer recognized as the explosion cause by `minecraft:fall\_after\_explosion` advancement criteria, while wind charges remain recognized.

EXPECTED BEHAVIOUR

When a player is launched by a TNT explosion and subsequently falls the required distance, the `minecraft:fall\_after\_explosion` advancement trigger should activate when its conditions specify TNT as the cause. A qualifying TNT launch should grant the corresponding advancement consistently in both Minecraft 1.21.11 and 26.1+, just as qualifying wind-charge launches continue to activate the vanilla advancement.

ENVIRONMENT

Minecraft Java Edition Version 26.1.2

ORIGINAL DESCRIPTION

Affected Versions: 26.1+

In snapshot 24w12a for the Minecraft Update 1.20.5 a new advancement trigger was added called `fall\_after\_explosion`. Internally, it was used for the Who Needs Rockets? advancement which was to launch yourself 8 blocks or higher using wind charges. For datapacks, it allowed to detect using TNT cannons to launch

yourself upwards, which is exactly what the BlazeandCave's Advancement Pack did. The advancement pack added an advancement called "We Have Liftoff!" to launch yourself 100 blocks upwards using TNT, clearly implying the use of TNT cannons to achieve the goal. Below you may find the difference in triggers between Who Needs Rockets? and We Have Liftoff!

Who Needs Rockets?

```
{{ "trigger": "minecraft:fall_after_explosion",}}
{{ "conditions": {}
{{ "cause": {}
{{ {}
{{ "condition": "minecraft:entity_properties",}}
{{ "entity": "this",}}
{{ "predicate": {}
{{ "type": "minecraft:wind_charge"}}
{{ }}}
{{ }}}
{{ },}}
{{ "distance": {}
{{ "y": {}
{{ "min": 8.0}}
```

We Have Liftoff!

```
{{ "trigger": "minecraft:fall_after_explosion",}}
{{ "conditions": {}
{{ "cause": {}
{{ {}
{{ "condition": "minecraft:entity_properties",}}
{{ "entity": "this",}}
{{ "predicate": {}
{{ "type": "minecraft:tnt"}}
{{ }}}
{{ }}}
{{ },}}
{{ "distance": {}
{{ "y": {}
{{ "min": 100.0}}
```

As you can see, the difference is very minimal.

Steps to reproduce:

You may replicate this advancement in your world in one of the 3 ways:

- 1) Use the custom datapack attached to this bug report compatible with both Minecraft 1.21.11 and 26.1
- 2) Change the Who Needs Rockets advancement to be 1:1 We Have Liftoff
- 3) Download the BlazeandCave's Advancement Pack 1.20.2 for Minecraft 1.21.11 and BlazeandCave's Advancement Pack 1.20.3 for Minecraft 26.1.x

After you have chosen a method, follow these steps to reproduce the issue:

- 1) Create a world with the attached datapack, modified advancement, or the BlazeandCave's Advancement Pack in Minecraft version 1.21.11;
- 2) Recreate the following contraption as shown in the video attached;

3) Create a world with the attached datapack, modified advancement, or the BlazeandCave's Advancement Pack in Minecra
