

Players don't receive thorns damage when attacking entities wearing thorns armor with indirect sweeping attacks

MC-200899 Combat

Status	Resolved / Fixed
Affected	1.16.3, 1.16.4 Release Candidate 1, 1.16.4, 20w46a, 20w51a, 21w03a (+14 more)
Fixed in	24w18a
Reported	2020-09-23

STEPS TO REPRODUCE

1. Place down a command block.
2. Enter `/summon minecraft:zombie ~ ~1 ~ {ArmorItems:[{id:"minecraft:diamond_boots",tag:{Enchantments:[{id:"minecraft:thorns",lvl:3}],Count:1b},{id:"minecraft:diamond_leggings",tag:{Enchantments:[{id:"minecraft:thorns",lvl:3}],Count:1b},{id:"minecraft:diamond_chestplate",tag:{Enchantments:[{id:"minecraft:thorns",lvl:3}],Count:1b},{id:"minecraft:diamond_helmet",tag:{Enchantments:[{id:"minecraft:thorns",lvl:3}],Count:1b}]}}` into the command block.
3. Activate the command block.
4. Obtain a wooden sword.
5. Enter `/summon minecraft:zombie ~ ~ ~ {ArmorItems:[{},{},{},{id:"minecraft:iron_helmet",Count:1b}]}` to summon another zombie.
6. Switch to Survival mode.
7. Wait until both zombies begin approaching you.
8. Perform a sweeping attack against the zombie wearing the iron helmet so that the zombie wearing the Thorns armor is also damaged.
9. Repeat the sweeping attack multiple times.
10. Observe that you do not receive Thorns damage from the zombie wearing the Thorns armor.

OBSERVED BEHAVIOUR

When the player performs a sweeping attack against the zombie wearing the iron helmet, the nearby zombie equipped with Thorns armor is damaged as a secondary target. However, this indirect sweeping damage does not trigger the Thorns enchantment: the player receives no retaliatory Thorns damage, even after repeatedly damaging the armored zombie with sweeping attacks.

EXPECTED BEHAVIOUR

When a player damages an entity wearing Thorns-enchanted armor through an indirect sweeping attack, the Thorns enchantment should respond as it does to a direct attack. The attacking player should receive the appropriate Thorns damage from the armored entity when the enchantment activates, even though the attack initially targets another nearby entity affected by the sweep.
