

Cannot switch to other windows using Cmd+Tab on macOS

MC - 228486 Input

Status	Resolved / Fixed
Affected	1.17 Pre-release 1, 1.17, 1.17.1 Pre-release 1
Fixed in	24w05b
Reported	2021-06-10

STEPS TO REPRODUCE

1. Launch Minecraft 1.17 on macOS.
2. Create a new Creative world with default settings.
3. Open Options -> Video Settings.
4. Set Fullscreen to On.
5. Return to the world.
6. Press Cmd+Tab.
7. Observe that the application-switching bar appears, but Minecraft does not switch to the other window or the desktop screen.

OBSERVED BEHAVIOUR

What actually happened was...:**

When Minecraft: Java Edition 1.17 is running in its built-in fullscreen mode on macOS, pressing ****Cmd+Tab**** displays the macOS application switcher, but the selected application does not receive focus. Minecraft remains active in the foreground, so I cannot switch to another window or return to the desktop using ****Cmd+Tab****.

EXPECTED BEHAVIOUR

When using Minecraft's built-in fullscreen mode on macOS, pressing Command+Tab should display the application switcher and successfully activate the selected application, allowing the user to switch from Minecraft to another window or the desktop. The selected application should come to the foreground rather than the switcher appearing while Minecraft remains active.

ENVIRONMENT

Minecraft Java Edition Versions: 1.17 Pre-release 1, 1.17, 1.17.1 Pre-release 1

ORIGINAL DESCRIPTION

I can't switch between tabs on Minecraft with command tab when using Minecraft's built-in fullscreen mode, I can usually press command and then tab to change tabs but since I got 1.17 this no longer works

What I expected to happen was...:

when I press command tab a little bar could appear and I should go to my desktop screen

What actually happened was...:

I get a little bar that swaps them but it doesn't swap

Steps to Reproduce:

1. press command tab
2. ...
3. ...
