

The parentheses used before and after the warning label within the language menu are untranslatable

MC-248833 Internationalisation

Status	Resolved / Fixed
Affected	1.18.1, 1.18.2 Release Candidate 1, 1.18.2, 1.19 Pre-release 1, 1.19, 1.19.1 (+6 more)
Fixed in	1.20.2 Pre-release 1
Reported	2022-02-27

STEPS TO REPRODUCE

1. Launch Minecraft.
2. Open Options from the main menu.
3. Open the language menu.
4. Locate the warning label stating that language translations may not be fully accurate.
5. Open the official Minecraft Crowdin project and search for the string `(`.
6. Search the same project for the string `)`.
7. Observe that the warning label's opening and closing parentheses have no translation keys and remain untranslatable.

OBSERVED BEHAVIOUR

In the language selection menu, the warning is displayed with hardcoded parentheses around the translated `options.languageWarning` text. The opening `(` and closing `)` are created as separate literal text components and do not have translation keys, so translators cannot localize or modify them through the language files.

This behavior is implemented in `LanguageSelectScreen` by constructing the warning as:

```
```java
new TextComponent("(")
.append(new TranslatableComponent("options.languageWarning"))
.append(")")
```
```

Consequently, only the warning text is translatable, while the surrounding parentheses remain fixed.

EXPECTED BEHAVIOUR

The language menu's warning label should include the opening and closing parentheses in its translatable text, allowing translators to localize the complete "(Language translations may not be 100% accurate)" message. The parentheses should not be hardcoded or omitted from translation resources, ensuring this warning behaves consistently with other parenthesized strings throughout the game.

ENVIRONMENT

Minecraft Java Edition Versions: 1.18.1, 1.18.2 Release Candidate 1, 1.18.2, 1.19 Pre-release 1, 1.19, 1.19.1, 1.19.2, 22w43a, 22w45a, 1.19.3, 1.19.4, 1.20.1 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

The "(" and ")" symbols used before and after the warning label within the language menu are untranslatable and are missing translation keys.

This is a problem because every other string throughout the game that contains parentheses is translatable, therefore introducing an inconsistency. Below, I've constructed a table to visually demonstrate how and why this is a valid internationalization issue and to show the inconsistency.

Translation Key

String

Context

Are parentheses translatable?

`selectServer.hiddenAddress`

(Hidden)

This string is used to show when a server address is hidden.

Yes

`menu.modded`

(Modded)

This string is used within the title screen to show when your instance of Minecraft is modded.

Yes

`options.biomeBlendRadius.3`

3x3 (Fast)

This string is used within the video settings menu to show the value of the biome blend radius option.

Yes

`multiplayer.status.no_connection`

(no connection)

This string is used within the multiplayer menu to show when you have no connection to a server.

Yes

`pack.folderInfo`

(Place pack files here)

This string is used within pack menus to show where to place packs.

Yes

`pack.incompatible.new`

(Made for a newer version of Minecraft)

This string is used within pack menus to show that the desired pack is made for a newer version of Minecraft.

Yes

`pack.incompatible.old`

(Made for an older version of Minecraft)

This string is used within pack menus to show that the desired pack is made for an older version of Minecraft.

Yes

N/A

(Language translations may not be 100%% accurate)

This string is used within the language menu to warn players that language translations may not be fully accurate.

No

Steps to Reproduce:

- Attempt to search for the existence of the string "(" by using this search filter, and the existence of the string ")" using this search filter, on the official Minecraft crowdin project.
- Take note as to whether or not the parentheses used before and after the warning label within the language menu are untranslatable.

Observed Behavior:

The parentheses used before and after the warning label within the language menu are untranslatable.

Expected Behavior:
