

Dropping items rapidly inside the "Survival Inventory" tab in creative mode deletes items

MC-116618 Inventory

Status	Resolved / Fixed
Affected	Minecraft 1.11.2, Minecraft 17w16b, Minecraft 1.12 Pre-Release 1, Minecraft 1.12 Pre-Release 2, Minecraft 1.12 Pre-Release 3, Minecraft 1.12 Pre-Release 5 (+129 more)
Fixed in	24w38a
Reported	2017-04-25

STEPS TO REPRODUCE

1. Launch Minecraft in version 20w09a or 24w18a.
2. Create and enter a Creative world.
3. Open the Creative inventory and select the "Survival Inventory" tab.
4. Fill the inventory with multiple stacks of items.
5. Hold Q and, in quick succession, hover over the item stacks one at a time.
6. Repeat the item-dropping action while holding Ctrl and pressing Q over multiple item stacks.
7. Observe that some, potentially most, of the item stacks disappear instead of being dropped.

OBSERVED BEHAVIOUR

In Creative mode, when using the **"Survival Inventory"** tab, rapidly dropping items with **Q** or **Ctrl + Q** causes some item stacks to disappear without creating corresponding dropped-item entities.

This occurs in both of the following cases:

- Holding **Q** while moving the cursor over individual item stacks.
- Holding **Ctrl + Q** while moving the cursor over multiple stacks.

After several rapid drop attempts, many of the targeted items are removed from the inventory but are not dropped into the world. The issue appears to occur when the server's drop-rate limit is reached: the client proceeds as though the item was dropped, while the server ignores the drop request without correcting the client's inventory. The issue does not reproduce in Survival or Adventure mode.

EXPECTED BEHAVIOUR

When rapidly dropping items from stacks in the creative-mode Survival Inventory tab using Q or Ctrl+Q, every selected item or stack should be removed from the inventory and spawned in the world as a dropped item. No items should disappear or be deleted, regardless of how quickly multiple stacks are processed. This behavior should remain consistent throughout the inventory interaction.

ORIGINAL DESCRIPTION

When you hover over stacks of items in the creative inventory and drop them using either ctrl + q over multiple stacks, or press and hold q over single item stacks, some items will be deleted. This does not occur for survival, or adventure mode.

Steps to Reproduce:

- Fill your inventory with stacks of items
- Hold down either q or ctrl + q
- In quick succession, hover over the item stacks in your inventory

Observed Behavior:

A majority of the items will be deleted.

Expected Result:

None of the items would be deleted, and all would be dropped.

Code Analysis:

(by tomudding)

The reason for this appears to be the `ServerGamePacketListenerImpl.dropSpamTickCount`. If the threshold is reached the server simply does not drop an item, however it does not inform the client of that.

Original Description:

The bug

When you hover over an item in your creative inventory and hold Q to drop those items (fast drop, because you hold Q), some items disappear, but when you are in survival (gamemode 0) zero items get deleted.
