

Shulker boxes and other blocks in the end exit portal when it changes state are not dropped as items

MC-272790 Items

Status	Resolved / Fixed
Affected	1.20.6, 1.21 Pre-Release 1, 1.21.3
Fixed in	25w03a
Reported	2024-05-31

STEPS TO REPRODUCE

1. Enter the End.
2. Place shulker boxes inside the end fountain.
3. Kill the dragon.
4. Observe that when the exit portal activates, the shulker boxes are not dropped as items and disappear.

OBSERVED BEHAVIOUR

Actual behavior

When the End exit portal is activated after the ender dragon is defeated, blocks located within or around the exit portal are replaced without dropping their corresponding items. This includes shulker boxes and other blocks, including blocks with stored contents. No item entities are created or sent through the portal, so the blocks - and any contents in them - are permanently lost.

The same occurs in reverse when the exit portal is deactivated during the ender dragon summoning ritual: blocks replaced by the restored fountain structure are removed without dropping as items.

EXPECTED BEHAVIOUR

When the End exit portal activates or deactivates, any blocks placed within or around the portal that are replaced by the portal structure should be dropped as their corresponding items rather than deleted. These item drops should remain recoverable and be sent through the portal, preserving shulker boxes and other affected blocks instead of permanently losing them.
