

Rabbits sometimes don't drop any raw rabbit upon being killed

MC-96449 Loot tables

Status	Resolved / Fixed
Affected	Minecraft 1.8.9, Minecraft 16w04a, Minecraft 1.11.2, Minecraft 17w06a, Minecraft 1.12.1, Minecraft 1.13.1 (+33 more)
Fixed in	22w42a
Reported	2016-01-31

STEPS TO REPRODUCE

1. Enter a Minecraft world.
2. Summon a rabbit by running `/summon minecraft:rabbit ~ ~ ~ {NoAI:1b,Health:1f}`.
3. Kill the summoned rabbit.
4. Check the loot it dropped.
5. If it dropped raw rabbit, summon another rabbit using `/summon minecraft:rabbit ~ ~ ~ {NoAI:1b,Health:1f}`.
6. Kill the newly summoned rabbit.
7. Repeat steps 4-6 until a rabbit does not drop raw rabbit.
8. Observe that the killed rabbit dropped no raw rabbit.

OBSERVED BEHAVIOUR

When a rabbit is killed under normal conditions, it can drop either one raw rabbit or no raw rabbit at all. The rabbit loot table uses a single roll with a uniform count ranging from `0`` to `1``, so the raw rabbit drop is not guaranteed. As a result, repeatedly killing rabbits can produce some rabbits that drop one raw rabbit and others that drop none, even when the rabbits are killed in the same way and without any special conditions.

EXPECTED BEHAVIOUR

Upon being killed, a rabbit should consistently drop at least one piece of raw rabbit, as expected for a passive food-producing mob. The drop should not randomly be absent, while any applicable additional drops from game mechanics such as Looting may still be handled normally.

ENVIRONMENT

Minecraft Java Edition Versions: 1.8.9, 16w04a, 1.11.2, 17w06a, 1.12.1, 1.13.1, 1.13.2, 19w05a, 19w06a, 19w07a, 1.15.2, 1.16.1, 1.16.4, 20w48a, 1.16.5, 21w05b, 21w06a, 21w07a, 21w11a, 21w16a, 21w17a, 1.17, 1.17.1, 21w40a, 21w42a, 21w43a, 21w44a, 1.18 Pre-release 1, 1.18 Pre-release 7, 1.18, 1.18.1, 22w03a, 22w05a, 22w06a, 1.18.2 Release Candidate 1, 1.18.2, 22w17a, 1.19, 1.19.2 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

Rabbits sometimes don't drop any raw rabbit upon being killed.

Every passive mob drops at least one piece of meat upon being killed, however, this isn't the case for rabbits.

Steps to Reproduce:

- Summon a rabbit.

-

`/summon minecraft:rabbit ~ ~ ~ {NoAI:1b,Health:1f}`

- Kill it and take note of the loot it dropped.

- If it dropped some meat, continue to spawn and kill rabbits until one of them doesn't.

- Take note as to whether or not rabbits sometimes don't drop any raw rabbit upon being killed.

Observed Behavior:

Rabbits sometimes don't drop any raw rabbit upon being killed.

Expected Behavior:

Rabbits would always drop at least one piece of meat upon being killed.

Code Analysis:

Code analysis by Avoma can be found below.

```
data > minecraft > loot_tables > entities > rabbit.json
```

```
{
  "type": "minecraft:entity",
  "pools": [
    ...
    {
      "bonus_rolls": 0.0,
      "entries": [
        {
          "type": "minecraft:item",
          "functions": [
            ...
            {
              "count": {
                "type": "minecraft:uniform",
                "max": 1.0,
                "min": 0.0
              },
              "function": "minecraft:looting_enchant"
            }
          ],
          "name": "minecraft:rabbit"
        }
      ],
      "rolls": 1.0
    },
    ...
  ]
}
```

If we look at the above json file, we can see that rabbits can drop a maximum of 1 raw rabbit and a minimum of 0 upon being killed, disregarding the use of the looting enchantment. This means that there is a 50% chance of a rabbit dropping raw rabbit upon death, thus resulting in this problem. Every other animal throughout the game such as cows, pigs, sheep, etc... have their minimum respective meat drop set to 1, meaning that they always have a guaranteed chance of dropping meat upon being killed, however, this isn't the case with rabbits as shown above.
