

Glow squids lack a baby variant

MC-215332 Parity

Status	Resolved / Fixed
Affected	21w06a, 21w07a, 21w08b, 21w10a, 21w11a, 21w13a (+112 more)
Fixed in	24w33a
Reported	2021-02-13

STEPS TO REPRODUCE

1. Launch Minecraft Java Edition.
2. Enter a world.
3. Execute `/summon minecraft:glow_squid ~ ~ ~ {Age:-25000}`.
4. Observe whether the summoned glow squid is a baby or an adult.

OBSERVED BEHAVIOUR

In Java Edition, executing:

```
```mcfunction
/summon minecraft:glow_squid ~ ~ ~ {Age:-25000}
```
```

summons an adult glow squid. The ``Age`` tag does not create a juvenile glow squid, because glow squids do not have a baby variant or ageable state in Java Edition. Consequently, Java Edition glow squids cannot be summoned or otherwise represented as babies, unlike their Bedrock Edition counterparts.

EXPECTED BEHAVIOUR

Executing the summon command with a negative Age value should create a baby glow squid in Java Edition rather than an adult. Baby glow squids should be available as a supported variant of the glow squid and behave consistently with the existing baby variant in Bedrock Edition, including remaining visually distinguishable from adult glow squids until they grow.

ORIGINAL DESCRIPTION

The Bug:

Parity issue: Baby glow squids exist in Bedrock Edition, but not in Java Edition.

Steps to Reproduce:

- Launch an instance of Java Edition, and attempt to summon a baby glow squid by using the following command.

-

```
/summon minecraft:glow_squid ~ ~ ~ {Age:-25000}
```

- Take note as to whether or not a baby or adult glow squid is summoned upon executing this command.

Observed Behavior:

Baby glow squids exist in Bedrock Edition, but not in Java Edition.

Expected Behavior:

Baby glow squids would exist in Java Edition, just like in Bedrock Edition.
