

The smoke particles of the explosion are displayed when Particles option is set to minimal

MC-93967 Particles

Status	Resolved / Fixed
Affected	Minecraft 1.8.8, Minecraft 15w47c, Minecraft 15w49a, Minecraft 15w49b, Minecraft 1.8.9, Minecraft 15w50a (+82 more)
Fixed in	1.15 Pre-release 1
Reported	2015-12-06

STEPS TO REPRODUCE

1. Launch Minecraft and create a Creative world with default settings.
2. Open Options -> Video Settings.
3. Set the Particles option to "Minimum."
4. Return to the world and ignite TNT.
5. Wait until the TNT explodes.
6. Observe that smoke particles appear after the explosion and that the game lags on slow computers.

OBSERVED BEHAVIOUR

After the TNT detonates, explosion smoke particles are still rendered even though the Particles setting is set to ****Minimal****. A large number of these particles may be visible and can cause noticeable performance degradation, particularly on slower computers.

EXPECTED BEHAVIOUR

With the Particles setting set to "Minimum," igniting TNT should still cause the explosion normally, but its explosion smoke particles should not be rendered. No explosion particle effect should appear after detonation, and the game should avoid the unnecessary performance impact caused by displaying those particles, particularly on slower computers.
