

You can feed adult donkeys, horses, llamas or mules with maximum Temper value, and hand animation is not played

MC-233276 Player Animation

Status	Resolved / Fixed
Affected	1.17.1, 21w37a, 21w38a, 21w39a, 21w40a, 21w41a (+32 more)
Fixed in	23w41a
Reported	2021-07-28

STEPS TO REPRODUCE

1. Launch Minecraft and create a Creative world.
2. Run `/summon horse ~ ~ ~ {Temper:100}`.
3. Select any food item.
4. Use the food item on the summoned adult horse.
5. Observe that the food is consumed without the hand animation, eating sounds, or other feeding animations being played.

OBSERVED BEHAVIOUR

Actual behavior

When an adult, untamed donkey, horse, llama, or mule has its `Temper`` value at the maximum (``100`` in the reproduction example), interacting with it while holding valid food consumes the food despite the animal already having maximum Temper.

The interaction does not play the usual player hand-swing animation or the animal's eating sound/animation. This is not a client-server desynchronization: the food is actually consumed by the animal. The issue occurs with all applicable food items, although a golden carrot may very rarely play the animation and sound once, typically on the first interaction.

EXPECTED BEHAVIOUR

When an adult donkey, horse, llama, or mule has reached its maximum Temper value, attempting to feed it should play the normal hand animation and interaction sounds, but the animal should not consume the food or otherwise change. This behavior should be consistent for all applicable food items and should occur reliably, without occasionally consuming food or playing the effects only once.

ENVIRONMENT

Minecraft Java Edition Versions: 1.17.1, 21w37a, 21w38a, 21w39a, 21w40a, 21w41a, 21w42a, 21w43a, 21w44a, 1.18 Pre-release 1, 1.18 Pre-release 2, 1.18 Pre-release 4, 1.18 Pre-release 5, 1.18 Pre-release 6, 1.18 Pre-release 8, 1.18 Release Candidate 3, 1.18, 1.18.1 Release Candidate 2, 1.18.1, 22w03a, 22w06a, 1.18.2 Pre-release 1, 22w11a, 22w17a, 22w18a, 1.19 Pre-release 1, 1.19, 1.19.1 Pre-release 5, 1.19.2, 22w42a, 22w46a, 23w06a, 1.19.4, 23w18a, 1.20 Release Candidate 1, 1.20, 1.20.1, 1.20.2 (includes snapshots)

ORIGINAL DESCRIPTION

The bug

You can feed adult donkeys, horses or mules with maximum Temper value, and the hand animation is not played.

The distinction of this issue from

MC-93825

Resolved

is that it is NOT a desync, and it is not

MC-236341

Resolved

as it happens only with a high temper value, and all food exhibits this behavior. However, sometimes golden carrots do play animation and sounds on the first time.

To reproduce

- Summon a donkey, horse, llama or mule with a Temper value of 100, e.g.

```
/summon horse ~ ~ ~ {Temper:100}
```

- Give the animal any food.

Very rarely, animations and sounds will be played one time.

No animations and sounds are played.

- Notice how the food is actually consumed, i.e. it is not a desync.

Expected result

You should not be able to feed said animal; as per

MC-201599

Open

, it should show the hand animation but the animal should not consume the food (this was the behavior in 1.15.2).

Analysis (tentative)

Code analysis by BugCrusherszz can be found in this comment.

I think that this is the piece of code that causes the issue, but I might be wrong.

net.minecraft.world.entity.animal.horse.AbstractHorse.java (Mojang mappings, 1.18-pre1)

...

```
protected boolean handleEating(Player $$0, ItemStack $$1) {
```

```
    boolean $$2 = false;
```

...

```
    if ($$5 > 0 && ($$2 || !this.isTamed()) && this.getTemper() < this.getMaxTemper()) {
```

```
        $$2 = true;
```

```
        if (!this.level.isClientSide) {
```

```
            this.modifyTemper($$5);
```

```
        }
```

```
    }
```

```
    if ($$2) {
```

```
        this.eating();
```

```
        this.gameEvent(GameEvent.EAT, this.eyeBlockPosition());
```

```
    }
```

...

If the animal's temper is equal or more than its max temper and it is not tamed, \$\$2 is not set to true, so the game event and animations will not play. At least, this is what I understood.
