

Horses glitch out and warning is logged in console when climbing up stairs

MC-100830 Player

Status	Resolved / Fixed
Affected	Minecraft 1.9.2, Minecraft 1.9.4, Minecraft 1.10, Minecraft 1.10.2, Minecraft 16w33a, Minecraft 16w35a (+62 more)
Fixed in	24w45a
Reported	2016-04-11

STEPS TO REPRODUCE

1. Open a Minecraft world or server where commands can be executed.
2. Execute `/summon minecraft:horse ~ ~ ~ {attributes:[{id:"minecraft:generic.movement_speed",base:0.35d}],Tame:1b,SaddleItem:{count:1,id:"minecraft:saddle"}}`.
3. Mount the summoned horse.
4. Move the horse to a staircase.
5. Ride the horse up the stairs.
6. Observe that the horse moves very slowly and may glitch or be reset backwards, while the server console or singleplayer game log records a warning such as `Horse (vehicle of <user>) moved wrongly! 0.5``.

OBSERVED BEHAVIOUR

Actual behaviour

While walking up a staircase, the ridden horse's movement is intermittently corrected by the server. The horse briefly snaps or is moved backward, resulting in noticeably slow and uneven progress up the stairs. Each correction logs a warning in the server console or singleplayer game log in the following form:

```
```text
```

```
Horse (vehicle of <user>) moved wrongly! 0.5
```

```
```
```

The warning may be logged repeatedly during the ascent.

EXPECTED BEHAVIOUR

When riding a horse up stairs, the horse should climb smoothly at its normal movement speed without becoming sluggish, glitching, or being reset backward. Its movement should remain consistent and responsive throughout the ascent, and the server console or single-player game log should not report erroneous movement warnings such as "Horse moved wrongly!"

ENVIRONMENT

Minecraft Java Edition Versions: 1.9.2, 1.9.4, 1.10, 1.10.2, 16w33a, 16w35a, 16w36a, 16w38a, 16w39a, 16w39b, 16w39c, 16w40a, 16w41a, 16w42a, 16w43a, 16w44a, 1.11 Pre-Release 1, 1.11, 16w50a, 1.11.2, 17w06a, 1.12 Pre-Release 5, 1.12, 1.12.1, 1.12.2 Pre-Release 1, 1.12.2 Pre-Release 2, 1.12.2, 17w50a, 18w01a, 18w02a, 18w03b, 18w05a, 18w10d, 1.13.1, 19w14a, 1.14 Pre-Release 3, 1.14, 1.14.4, 19w37a, 1.15 Pre-release 1, 1.15.2, 20w11a, 1.16.1, 20w27a, 1.16.2 Pre-release 1, 1.16.2, 20w51a, 1.17 Pre-release 1, 1.17 Pre-release 2, 1.17 Pre-release 3, 1.17, 1.17.1 Pre-release 1, 1.17.1, 21w39a, 21w40a, 21w41a, 1.18 Pre-release 1, 1.18, 1.18.1 Pre-release 1, 1.18.1, 22w03a, 1.18.2, 1.19.2, 23w14a, 1.20.1, 23w40a, 1.21 Pre-Release 2, 1.21 (includes snapshots)

ORIGINAL DESCRIPTION

When climbing up blocks while riding a horse, the horse occasionally glitches slightly (it gets reset backwards by the server), and the "Horse moved wrongly!" warning is logged in the server console (or game log in singleplayer).

In particular, this happens almost always when walking up stairs with horses, although it doesn't appear to happen with slabs. However, this issue has also been reported to occasionally happen if there are no stairs involved (e.g.

MC-147523

Resolved

).

Steps to Reproduce

- Summon a moderately fast horse, e.g. by using the command provided below.

```
/summon minecraft:horse ~ ~ ~ {attributes:[{id:"minecraft:generic.movement_speed",base:0.35d}],Tame:1b,SaddleItem:{count:1,id:"minecraft:saddle"}}
```

- Mount the horse and climb up stairs with it.

- As you do this, pay close attention to the horse's movement and frequently check the server console / game log.

Expected behaviour

The horse can properly walk up the stairs.

Actual behaviour

The horse is very slow walking up the stairs; additionally in the server console / game log, warnings of the following format are sent:

Horse (vehicle of <user>) moved wrongly! 0.5

Notes

This is a new problem since the 1.9 update, and it happens with all horses, no matter their speed.

This also affects other entities than horses, however it appears most frequently with horses in regular gameplay. For example, camels with Speed II are also affected by this when sprinting, and so are pigs with Speed V.
