

Raid results in victory if it cannot find a valid spawn point

MC-158389 Raids

Status	Resolved / Fixed
Affected	1.14.4, 1.17.1, 21w38a, 21w43a, 1.18 Release Candidate 3, 1.18.1 (+2 more)
Fixed in	24w33a
Reported	2019-08-04

STEPS TO REPRODUCE

1. Create a Creative world.
2. Build a village high in the sky.
3. Give yourself Bad Omen.
4. Enter the village to start a raid.
5. Wait until the raid bar fills as normal.
6. Observe that the raid bar instantly drains after moments, the raid is declared a victory, and no other waves are generated.

OBSERVED BEHAVIOUR

Actual behavior

After entering the sky-built village while affected by **Bad Omen**, a raid starts and the raid bar fills normally. However, no raiders spawn because the raid cannot find a valid spawn location. After a short time, the raid bar immediately drains and the game declares **"Raid victory"**, even though no raid waves were generated and no raiders were defeated.

Video demonstration: <https://youtu.be/w49tvtnXvTk>

EXPECTED BEHAVIOUR

When a raid is triggered in the sky-built village, the raid should not be declared victorious merely because no valid spawn point is available. The raid should remain active with its progress bar displayed, and no victory should be granted or waves skipped solely due to the lack of an immediately usable spawn location.

ENVIRONMENT

Minecraft Java Edition Versions: 1.14.4, 1.17.1, 21w38a, 21w43a, 1.18 Release Candidate 3, 1.18.1, 22w07a, 1.19.2 (includes snapshots)

ORIGINAL DESCRIPTION

I gave myself bad omen and went into a village I built high in the sky. The raid bar filled up as normal, but then instantly drained and was declared a victory after moments (and no other waves generated). Video: <https://youtu.be/w49tvtnXvTk>
