

The server occasionally fails to save chunks

MC-249431 Save Data

Status	Resolved / Fixed
Affected	22w12a
Fixed in	22w13a
Reported	2022-03-24

STEPS TO REPRODUCE

1. Start a server running 22w12a.
2. Join the server.
3. Execute `/tp @s ~10000 ~ ~`.
4. Execute `/kill @s`.
5. Respawn after being killed.
6. Repeat the teleport, kill, and respawn sequence to check for the intermittent behavior.
7. Shortly after respawning, observe the server console for a `Failed to save chunk` error.

OBSERVED BEHAVIOUR

After teleporting approximately 10,000 blocks away and using `/kill`, the server intermittently logs an error while unloading or saving chunks. The error identifies a chunk such as `-16,-11` and reports:

```
```text
```

```
[Server thread/ERROR]: Failed to save chunk -16,-11
```

```
java.lang.NullPointerException: Cannot invoke "java.util.UUID.getMostSignificantBits()" because "$0" is null
```

```
```
```

The exception occurs during serialization of the chunk data. As a result, the affected chunk save operation fails for that attempt. The issue is intermittent and may not occur every time the reproduction steps are performed. This behavior is reproducible in 22w12a but was not observed in 1.18.2 or 22w11a.

EXPECTED BEHAVIOUR

After teleporting a far distance away, using `/kill`, and respawning, the server should save all unloaded chunks successfully without occasionally logging a "Failed to save chunk" error or an associated exception in the console. Chunk saving should remain reliable and consistent, as it was in version 1.18.2 and snapshot 22w11a.

ENVIRONMENT

Minecraft Java Edition Version 22w12a (snapshot)

ORIGINAL DESCRIPTION

The Bug:

The "Failed to save chunk" error is sometimes logged in the server console, thus indicating that the server occasionally fails to save chunks.

This issue was not present in 1.18.2 or 22w11a.

The following message was printed into the server console shortly after teleporting a far distance away and then running the `/kill` command. The full server log has also been attached which can be found below.

MC-249431 - Server Console Log.log

```
[18:22:28] [Server thread/ERROR]: Failed to save chunk -16,-11
```

```
java.lang.NullPointerException: Cannot invoke "java.util.UUID.getMostSignificantBits()" because "$0" is null
```
