

The sounds of goats stomping and ramming aren't controlled by the "Friendly Creatures" sound slider

MC-244694 Sound

Status	Resolved / Fixed
Affected	1.18, 1.18.1, 22w05a, 22w06a, 1.18.2 Pre-release 1, 1.18.2 (+3 more)
Fixed in	22w43a
Reported	2021-12-04

STEPS TO REPRODUCE

1. Launch Minecraft and create a Creative world with default settings.
2. Open Options -> Music & Sounds.
3. Set the Friendly Creatures sound slider to OFF.
4. Set every other sound slider to 100%.
5. Exit the settings menu and summon a goat.
6. Switch to Survival mode.
7. Run `/execute as @e[type=minecraft:goat,limit=1,sort=nearest] run data modify entity @s Brain.memories."minecraft:ram_cooldown_ticks".value set value 1``.
8. Wait until the goat stomps and rams you.
9. Listen for the goat's stomping and ramming sounds and observe that they can still be heard with Friendly Creatures set to OFF, indicating that they are controlled by Hostile Creatures instead.

OBSERVED BEHAVIOUR

Goat stomping and ramming sounds are assigned to the ``HOSTILE`` sound source rather than the ``NEUTRAL`` sound source used by the other goat sounds.

As a result:

- With **Friendly Creatures** set to **0%** and **Hostile Creatures** set above **0%**, goat stomping and ramming sounds remain audible.
- With **Hostile Creatures** set to **0%**, those sounds are muted.

This affects both regular goats and screaming goats. The sounds are therefore controlled by the **Hostile Creatures** slider, despite the other goat entity sounds being controlled by **Friendly Creatures**.

EXPECTED BEHAVIOUR

With the "Friendly Creatures" sound slider set to OFF, goat stomping and ramming sounds should be muted, even when the "Hostile Creatures" slider and all other sound sliders are set to 100%. Increasing the "Friendly Creatures" slider should control the volume of both sounds, consistently with the other sounds produced by goats and friendly mobs.

ENVIRONMENT

Minecraft Java Edition Versions: 1.18, 1.18.1, 22w05a, 22w06a, 1.18.2 Pre-release 1, 1.18.2, 1.19, 1.19.1, 1.19.2 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

The sounds of goats stomping and ramming aren't controlled by the "Friendly Creatures" sound slider and are instead controlled by the "Hostile Creatures" sound slider.

This is a problem and inconsistency because all mobs except goats have all their sounds assigned to one sound slider and not multiple of them. For example, friendly bee sounds and angry bee sounds are all controlled by one sound slider, that being "Friendly Creatures". Below I've constructed a table of all goat sounds and their assigned sound sliders for a visual comparison of the issue.

Affected Sounds:

Before reading the table, please note the following:

- Words colored in GREEN reflect the correct behavior.
- Words colored in RED reflect the incorrect behavior.

Goat / Screaming Goat Sound

Current Assigned Sound Slider

Expected Assigned Sound Slider

Steps to Reproduce:

- Navigate to the "Music & Sounds" settings menu.
- Turn the "Friendly Creatures" sound slider to "OFF".
- Turn every other sound slider to "100%".
- Exit this menu, summon a goat, and switch into survival mode.

- Make the gam ram you by altering its NBT data.

-

/execute as @e[type=minecraft:goat,limit=1,sort=nearest] run data modify entity @s
Brain.memories."minecraft:ram_cooldown_ticks".value set value 1

- Listen closely as the goat stomps and rams you.

- Take note as to whether or not the sounds of goats stomping and ramming can be heard, (are controlled by the
"Hostile Creatures" sound slider inst
