

Goat eating sounds aren't played when feeding them the last item of wheat within a stack

MC-244739 Sound

Status	Resolved / Fixed
Affected	1.18, 1.18.1, 22w03a, 22w05a, 22w06a, 1.18.2 Pre-release 1 (+13 more)
Fixed in	24w33a
Reported	2021-12-05

STEPS TO REPRODUCE

1. Obtain two pieces of wheat.
2. Place both pieces of wheat in the same hotbar slot.
3. Summon two goats.
4. Switch to Survival mode.
5. Feed one goat one piece of wheat.
6. Listen for and note the goat eating sound.
7. Feed the other goat the remaining piece of wheat.
8. Observe that no goat eating sound is played when feeding the last piece of wheat.

OBSERVED BEHAVIOUR

When a goat is fed wheat from a stack containing multiple items, the goat eating sound plays normally. However, when the final wheat item is fed:

- The wheat is consumed and the goat is fed successfully.
- The player's held stack becomes empty (`AIR`).
- No goat eating sound is played for nearby players.

This occurs because the interaction decrements the wheat stack before `Goat#mobInteract` checks whether the held `ItemStack` is food. After the final item is removed, the stack no longer contains wheat, so the food check returns false and the eating sound is not emitted.

EXPECTED BEHAVIOUR

When a goat is successfully fed wheat, it should play its eating sound regardless of whether the wheat stack contains multiple items or only one remaining item. Feeding the last piece of wheat from a stack should trigger the same eating sound as feeding earlier pieces, while the wheat is consumed normally and the interaction succeeds.

ENVIRONMENT

Minecraft Java Edition Versions: 1.18, 1.18.1, 22w03a, 22w05a, 22w06a, 1.18.2 Pre-release 1, 1.18.2, 22w15a, 22w17a, 22w18a, 1.19, 1.19.1, 1.19.2, 1.19.3, 23w07a, 1.19.4, 1.20.1, 1.20.2, 1.21 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

Goat eating sounds aren't played when feeding them the last item of wheat within a stack.

Steps to Reproduce:

- Obtain two pieces of what and ensure that they occupy the same hotbar slot.
- Summon two goats and switch into survival mode.
- Feed one of the goats a piece of wheat and take note of how goat eating sounds are played.
- Feed the other goat the remaining piece of wheat and listen closely as you do this.
- Take note as to whether or not goat eating sounds are played when feeding them the last item of wheat within a stack.

Observed Behavior:

Goat eating sounds aren't played.

Expected Behavior:

Goat eating sounds would be played.

Code Analysis:

Code analysis by Apollo30 can be found below.

The following is based on a decompiled version of Minecraft 1.20.1 using MCP-Reborn.

net.minecraft.world.entity.animal.Goat.java

```
public class Goat extends Animal {
...
public InteractionResult mobInteract(Player player, InteractionHand interactionHand) {
    ItemStack itemstack = player.getItemInHand(interactionHand);
    if (itemstack.is(Items.BUCKET) && !this.isBaby()) {
        player.playSound(this.getMilkingSound(), 1.0F, 1.0F);
        ItemStack itemstack1 = ItemUtils.createFilledResult(itemstack, player, Items.MILK_BUCKET.getDefaultInstance());
        player.setItemInHand(interactionHand, itemstack1);
        return InteractionResult.sidedSuccess(this.level().isClientSide);
    } else {
        InteractionResult interactionresult = super.mobInteract(player, interactionHand);
        if (interactionresult.consumesAction() && this.isFood(itemstack)) {
            this.level().playSound((Player)null, this, this.getEatingSound(itemstack), SoundSource.NEUTRAL, 1.0F,
            Mth.randomBetween(this.level().random, 0.8F, 1.2F));
        }
        return interactionresult;
    }
}
...
}
```

In the Goat.java class there is the Goat#mobInteract method. We see two important methods; super#mobInteract which is a method of a superclass called Animal. This method handles the decrementing of the held itemstack's amount.

The problem with the line after Goat#mobInteract is that we check if the itemstack is food via the method this#isFood, but since the player has one of that itemstack, the method removes that last amount
