

minecraft.used:minecraft.goat_horn doesn't increase when using goat horns

MC-250943 Statistics

Status	Resolved / Fixed
Affected	22w17a, 22w18a, 22w19a, 1.19 Pre-release 1, 1.19 Pre-release 2, 1.19 (+5 more)
Fixed in	22w42a
Reported	2022-04-27

STEPS TO REPRODUCE

1. Create a Creative world with default settings.
2. Run `/scoreboard objectives add UseGoatHorn minecraft.used:minecraft.goat_horn``.
3. Run `/scoreboard objectives setdisplay sidebar UseGoatHorn``.
4. Obtain a goat horn.
5. Use the goat horn once.
6. Observe that the ``UseGoatHorn`` scoreboard value does not increase.

OBSERVED BEHAVIOUR

When a goat horn is successfully used, it plays its call and enters its cooldown as expected, but the player's ``minecraft.used:minecraft.goat_horn`` statistic is not incremented. Consequently, a scoreboard objective using this criterion remains unchanged instead of increasing by 1 for each use.

EXPECTED BEHAVIOUR

When a player successfully uses a goat horn, the ``minecraft.used:minecraft.goat_horn`` statistic should increase by one for that player. A scoreboard objective using this criterion should therefore update and display the incremented value, allowing each successful goat horn use to be tracked accurately.

ENVIRONMENT

Minecraft Java Edition Versions: 22w17a, 22w18a, 22w19a, 1.19 Pre-release 1, 1.19 Pre-release 2, 1.19, 1.19.1 Pre-release 1, 1.19.1 Pre-release 2, 1.19.1 Pre-release 5, 1.19.1, 1.19.2 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

minecraft.used:minecraft.goat_horn doesn't increase when using goat horns.

Steps to Reproduce:

- Create a scoreboard objective for tracking the use of a goat horn and set it to display on the sidebar.

-

```
/scoreboard objectives add UseGoatHorn minecraft.used:minecraft.goat_horn
```

-

```
/scoreboard objectives setdisplay sidebar UseGoatHorn
```

- Obtain a goat horn and use it.

- Take note as to whether or not `minecraft.used:minecraft.goat_horn` increases when using goat horns.

Observed Behavior:

The scoreboard doesn't increase.

Expected Behavior:

The scoreboard would increase.

Code Analysis:

Code analysis by Avoma can be found below.

The following is based on a decompiled version of Minecraft 1.19 Pre-release 2 using Mojang mappings.

```
net.minecraft.world.item.InstrumentItem.java
```

```
public class InstrumentItem extends Item {
```

```
...
```

```
@Override
```

```
public InteractionResultHolder<ItemStack> use(Level level, Player player, InteractionHand interactionHand) {
```

```
ItemStack itemStack = player.getItemInHand(interactionHand);
```

```
Optional<Holder<Instrument>> optional = this.getInstrument(itemStack);
```

```
if (optional.isPresent()) {
```

```
Instrument instrument = optional.get().value();
```

```
player.startUsingItem(interactionHand);
```

```
InstrumentItem.play(level, player, instrument);
```

```
player.getCooldowns().addCooldown(this, instrument.useDuration());
```

```
return InteractionResultHolder.consume(itemStack);
```

```
}
```

```
return InteractionResultHolder.fail(itemStack);
```

```
}
```

```
...
```

If we look at the above class, we can see that the `awardStat()` method (the method responsible for incrementing player statistics) is never called throughout this piece of code, thus making `minecraft.used:minecraft.goat_horn` not increase when using goat horns.

Fix:

Simply calling the `awardStat()` method where appropriate within this piece of code will resolve this problem. The following line of code can be used to fix this issue.

```
player.awardStat(Stats.ITEM_USED.get(this));
```
