

Statistics are no longer saved if the folder they would save into doesn't exist yet

MC-303704 Statistics

Status	Resolved / Fixed
Affected	25w44a
Fixed in	25w45a
Reported	2025-10-28

STEPS TO REPRODUCE

1. Launch Minecraft and select Singleplayer.
2. Create a new world.
3. Break a few blocks.
4. Open the statistics screen and confirm that the broken blocks are listed.
5. Leave the world using Esc menu -> Save and Quit to Title.
6. Select the same world and open it again.
7. Open the statistics screen and observe that the previously recorded statistics are gone.

OBSERVED BEHAVIOUR

Actual behavior

In newly created singleplayer worlds and servers, Minecraft does not create the world's `stats` directory. Statistics are displayed during the current session, but they are not persisted when the world is closed or the player leaves and rejoins. After reopening the world, statistics such as blocks broken have been reset.

Running `/save-all` produces an error because Minecraft attempts to write the player's statistics file without first creating the parent directory:

```
```text
Couldn't save stats to ./world/stats/<player-uuid>.json
java.nio.file.NoSuchFileException: ./world/stats/<player-uuid>.json
```
```

The statistics file cannot be created while `./world/stats/` does not exist. This affects both newly created singleplayer worlds and worlds hosted on servers.

EXPECTED BEHAVIOUR

After breaking blocks in a newly created world, the corresponding player statistics should be saved successfully and remain available after leaving and reopening the world. Statistics should persist consistently in both singleplayer worlds and on servers, including when using `/save-all`, without being reset or producing an error because the world's statistics storage location does not yet exist.

ENVIRONMENT

Minecraft Java Edition Version 25w44a (snapshot)

ORIGINAL DESCRIPTION

Minecraft no longer saves player stats to the world folder in newly created worlds, resulting in them being reset every time the player joins the world. This affects both servers and singleplayer worlds.

Steps to reproduce:

- Create a new world
- Break a few blocks
- Check statistics, broken blocks should be listed there
- Leave world and open it again

- Check statistics, previous stats are now gone

The following related error is logged when running "/save-all":

```
[19:56:17] [Server thread/ERROR]: Couldn't save stats to
./world/stats/a0798455-f768-4abe-b2fc-da8478d04e02.json
java.nio.file.NoSuchFileException: ./world/stats/a0798455-f768-4abe-b2fc-da8478d04e02.json
