

Some words within "/spreadplayers" command feedback messages are always pluralized

MC-211071 Text

Status	Resolved / Fixed
Affected	1.16.4, 20w51a, 21w03a, 1.16.5, 21w05a, 21w05b (+21 more)
Fixed in	1.19.4 Pre-release 4
Reported	2021-01-10

STEPS TO REPRODUCE

1. Launch Minecraft and create a Creative world with default settings.
2. Open the chat.
3. Run `/tellraw @s {"translate":"commands.spreadplayers.success.teams"}``.
4. Repeat the command with ``commands.spreadplayers.success.entities``, ``commands.spreadplayers.failed.teams``, and ``commands.spreadplayers.failed.entities`` as the translation key.
5. Inspect the words describing the number of teams, players, or entities in each displayed message.
6. Observe that the affected words use plural forms even when the value before the noun is ``1``, instead of using the corresponding singular form.

OBSERVED BEHAVIOUR

The affected ``/spreadplayers`` translation strings always use plural nouns, regardless of the numeric value supplied for the ``%s`` placeholder.

When the value is ``1``, the messages still display:

- ``1 teams`` instead of ``1 team``
- ``1 players`` instead of ``1 player``
- ``1 entities`` instead of ``1 entity``

This occurs in both the success and failure messages associated with the affected translation keys:

- ``commands.spreadplayers.success.teams``
- ``commands.spreadplayers.success.entities``
- ``commands.spreadplayers.failed.teams``
- ``commands.spreadplayers.failed.entities``

The message text does not automatically switch between singular and plural forms based on the count, resulting in grammatically incorrect feedback when exactly one team, player, or entity is affected.

EXPECTED BEHAVIOUR

When the ``/spreadplayers`` feedback messages are displayed, nouns such as "team," "player," and "entity" should use their singular form when the preceding value is 1 and their plural form for other values. This grammatical agreement should apply consistently to both successful and failed spread messages, without any affected noun being permanently pluralized.

ENVIRONMENT

Minecraft Java Edition Versions: 1.16.4, 20w51a, 21w03a, 1.16.5, 21w05a, 21w05b, 21w06a, 21w07a, 21w08a, 21w08b, 21w10a, 21w11a, 21w13a, 21w14a, 21w15a, 21w16a, 21w17a, 21w18a, 1.17, 1.17.1, 21w40a, 1.18.1, 22w03a, 1.18.2, 1.19 Pre-release 1, 1.19.2, 1.19.3 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

Some words within "/spreadplayers" command feedback messages are always pluralized.

This is an issue because when the value before the given noun is "1", the noun's plural form is used instead of its singular one, therefore making the string grammatically incorrect in some cases.

Affected Strings:

Before reading the table, please note the following:

- Words colored in GREEN are correct.
- Words colored in RED are incorrect.

Translation Key

Current String

Expected String

String URL on Crowdin

commands.spreadplayers.success.teams

Spread %s teams around %s, %s with an average distance of %s blocks apart

Spread %s team(s) around %s, %s with an average distance of %s blocks apart

<https://crowdin.com/translate/minecraft/10038/enus-engb#5341276>

commands.spreadplayers.success.entities

Spread %s players around %s, %s with an average distance of %s blocks apart

Spread %s player(s) around %s, %s with an average distance of %s blocks apart

<https://crowdin.com/translate/minecraft/10038/enus-engb#5341278>

commands.spreadplayers.failed.teams

Could not spread %s teams around %s, %s (too many entities for space - try using spread of at most %s)

Could not spread %s team(s) around %s, %s (too many entities for space - try using spread of at most %s)

<https://crowdin.com/translate/minecraft/10038/enus-engb#5341932>

commands.spreadplayers.failed.entities

Could not spread %s entities around %s, %s (too many entities for space - try using spread of at most %s)

Could not spread %s entity/entities around %s, %s (too many entities for space - try using spread of at most %s)

<https://crowdin.com/translate/minecraft/10038/enus-engb#5341934>

Alternatively, instead of having one string cover both the plural and non-plural variants of the word, two separate translation strings could be created, one of which covers the plural variant and the other that covers the non-plural variant.

Steps to Reproduce:

- Display any of the affected strings as listed above by using the command provided below and replacing "XYZ" with the string's translation key.

```
/tellraw @s {"translate":"XYZ"}
```

- Look closely at the affected words within the string.
- Take
