

Several strings throughout the game contain comma splices

MC-250062 Text

Status	Resolved / Fixed
Affected	1.18.2, 22w14a, 22w15a, 22w16b, 22w17a, 22w18a (+20 more)
Fixed in	25w36a
Reported	2022-04-09

STEPS TO REPRODUCE

1. Launch Minecraft and create a Creative world with default settings.
2. Open the chat.
3. Enter `/tellraw @s {"translate":"argument.range.ints"}`.
4. Repeat the command using other affected translation keys listed in the report, replacing `argument.range.ints` with the selected key.
5. Observe that the displayed strings contain commas linking independent clauses or sentence parts where a semicolon, colon, conjunction, or full stop should be used.

OBSERVED BEHAVIOUR

The affected translation strings are displayed with commas joining clauses or separate pieces of information that should be separated by stronger punctuation or a conjunction. This results in comma splices in multiple areas of the game, including world selection, multiplayer and Realms messages, command argument errors, command feedback, and test framework messages.

Examples include:

- `multiplayer.message_not_delivered`: "Can't deliver chat message, check server logs: %s"
- `argument.range.ints`: "Only whole numbers allowed, not decimals"
- `commands.data.modify.expected_list`: "Expected list, got: %s"
- `test.error.value_not_equal`: "Expected %s to be %s, was %s"
- `commands.test.locate.started`: "Started locating test structures, this might take a while..."

When an affected translation key is displayed, the comma remains in the rendered text rather than being replaced by a semicolon, colon, conjunction, or sentence-ending period. The issue is present in the translation text itself and does not depend on the player's world, command arguments, or server configuration.

EXPECTED BEHAVIOUR

All affected translation strings should use grammatically correct punctuation and wording when displayed. Independent clauses should not be joined by comma splices; they should instead be separated with a period, semicolon, or colon, or joined with an appropriate conjunction. The corrected messages should preserve their intended meaning, placeholders, and functionality while presenting clear, properly punctuated text throughout the game.

ENVIRONMENT

Minecraft Java Edition Versions: 1.18.2, 22w14a, 22w15a, 22w16b, 22w17a, 22w18a, 1.19 Pre-release 1, 1.19 Release Candidate 2, 1.19, 1.19.1, 1.19.2, 22w45a, 1.19.3, 23w03a, 1.19.4, 23w12a, 1.20.1, 23w31a, 1.20.2, 1.20.3 Pre-Release 2, 1.20.4, 23w51b, 24w20a, 1.21, 24w45a, 1.21.4 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

Several strings throughout the game contain comma splices.

For a bit of context, a comma splice is when an instance of a comma is used to link two independent clauses, (an independent clause is a clause that can form a complete sentence standing alone). The use of a comma splice is grammatically incorrect and should instead be replaced with a colon, semicolon, conjunction, or a period/full stop.

Affected Strings:

Before reading the table, please note the following:

- Characters colored in GREEN are correct.
- Characters colored in RED are incorrect.

Translation Key

Current String
