

The word "whilst" within several death messages isn't spelled in American English

MC-252295 Text

Status	Resolved / Fixed
Affected	1.18.2, 1.19 Pre-release 3, 1.19 Release Candidate 2, 1.19, 1.19.1 Pre-release 1, 1.19.1 Pre-release 2 (+9 more)
Fixed in	1.20.2 Pre-release 1
Reported	2022-05-28

STEPS TO REPRODUCE

1. Launch Minecraft.
2. Create or open a world.
3. Have two players fight until one player is killed by the other.
4. Observe the displayed death message and note that it uses "whilst" in "was killed whilst fighting" instead of "while."

OBSERVED BEHAVIOUR

In the `en\_us` language strings, several death-message variants use `***whilst***` in phrases such as "whilst fighting" and "whilst trying to escape." For example:

- `%1\$s was struck by lightning whilst fighting %2\$s`
- `%1\$s drowned whilst trying to escape %2\$s`
- `%1\$s was killed whilst fighting %2\$s`

These messages are displayed with `***whilst***` instead of `***while***`. Other related death messages already use "while," such as ``death.fell.accident.other_climbable``, resulting in inconsistent wording within the source-language messages.

EXPECTED BEHAVIOUR

All affected death messages should use the American English wording "while" instead of "whilst" when describing an action occurring during another event, such as fighting or attempting to escape. The messages should remain grammatically correct and consistent with Minecraft's English (United States) source language, while preserving the existing death-message meaning and formatting.

ENVIRONMENT

Minecraft Java Edition Versions: 1.18.2, 1.19 Pre-release 3, 1.19 Release Candidate 2, 1.19, 1.19.1 Pre-release 1, 1.19.1 Pre-release 2, 1.19.1 Pre-release 5, 1.19.1 Release Candidate 2, 1.19.1, 1.19.2, 22w45a, 1.19.3, 1.19.4, 1.20 Pre-release 1, 1.20.1 (includes snapshots)

ORIGINAL DESCRIPTION

The Bug:

The word "whilst" within several death messages isn't spelled in American English.

Minecraft's source language, (which is English, United States), always spells words in American English, however, the word "whilst" within most death messages isn't spelled in American English. It should be "while" instead of "whilst". Additionally, the word "while" is often used to describe time, whereas the word "whilst" is often used to describe contrast, and since no contrast is being defined within any of these strings, the death messages are grammatically incorrect.

It's important to note that both "whilst" and "while" are acceptable spellings, however, "while" is most popular and is typically used in American English. On the other hand, "whilst" is the most common form in other parts of the world, such as British English, etc...

Below is a table I've constructed that lists all death messages in the game that contain the words "whilst" or "while" to show the issue that's present here.

Affected Strings:

Before reading the table, please note the following:

- Words colored in GREEN are correct.
- Words colored in ORANGE are correct but are different issues therefore are being tracked in other tickets.
- Words colored in RED are incorrect.

Translation Key

Current String

Expected String

Notes

death.attack.lightningBolt.player

%1\$s was struck by lightning whilst fighting %2\$s

%1\$s was struck by lightning while fighting %2\$s

death.attack.inFire.player

%1\$s walked into fire whilst fighting %2\$s

%1\$s walked into fire while fighting %2\$s

death.attack.onFire.player

%1\$s was burnt to a crisp whilst fighting %2\$s

%1\$s was burned to a crisp while fighting %2\$s

The word "burnt" within this string also isn't spelled in American English. That issue is currently being tracked at MC-252316

Resolved

.

death.attack.inWall.player

%1\$s suffocated in a wall whilst fighting %2\$s

%1\$s suffocated in a wall while fighting %2\$s

death.attack.drown.player

%1\$s drowned whilst trying to escape %2\$s

%1\$s drowned while trying to escape %2\$s

death.attack.dryout.player

%1\$s died from dehydration whilst trying to escape %2\$s

%1\$s died
