

Villager trades air if it has a totem of undying trade and uses the held totem

MC-255829 Trading

Status	Resolved / Fixed
Affected	1.19.2, 22w42a, 22w43a, 22w44a, 22w45a, 22w46a (+24 more)
Fixed in	1.20.2 Pre-Release 3
Reported	2022-09-09

STEPS TO REPRODUCE

1. Launch Minecraft and create a Creative world with default settings.
2. Execute `/summon minecraft:villager ~ ~ ~ {VillagerData:{type:plains,profession:farmer,level:2},Offers:{Recipe s:[{buy:{id:emerald,Count:1},sell:{id:totem_of_undying,Count:1}}]},Health:1,Attributes:[{Name:"generic.max_health",Base:1f}]}``
3. Select an emerald so that it is held in your hand.
4. Attack the summoned villager until it takes lethal damage.
5. Observe the villager use the totem of undying.
6. Open the villager's trading menu.
7. Observe that the totem of undying in the trade has been replaced with air.

OBSERVED BEHAVIOUR

Actual behavior

When the villager is holding the emerald specified as the trade input, it displays the corresponding totem of undying from its trade as its held item. If the villager is then dealt lethal damage, the held totem activates and is consumed, preventing the villager from dying.

After the totem activates, the villager's trade remains present, but its sell item is replaced by an empty item stack. The trading interface therefore displays **air** as the trade result instead of the totem of undying.

EXPECTED BEHAVIOUR

After the villager uses the Totem of Undying to survive, its existing trade should remain valid and display the Totem of Undying as the offered item, allowing it to be traded normally. Alternatively, the trade should be removed or disabled if the villager can no longer provide the item, but it should never be replaced with air.

ENVIRONMENT

Minecraft Java Edition Versions: 1.19.2, 22w42a, 22w43a, 22w44a, 22w45a, 22w46a, 1.19.3 Pre-release 2, 1.19.3 Release Candidate 1, 1.19.3, 23w03a, 23w04a, 1.19.4 Pre-release 1, 1.19.4 Pre-release 3, 1.19.4, 23w12a, 23w13a, 23w14a, 23w16a, 23w17a, 23w18a, 1.20 Pre-release 1, 1.20 Pre-release 2, 1.20 Pre-release 4, 1.20 Pre-release 5, 1.20 Pre-release 6, 1.20 Pre-release 7, 1.20 Release Candidate 1, 1.20, 1.20.1, 23w31a (includes snapshots)

ORIGINAL DESCRIPTION

If you hold an item that the villager is buying, it will hold out an item that its selling corresponding to the item you were holding. Now if that item were to be a totem of undying the villager holds, you can kill it and make it use it to glitch out that trade. I would expect a different result like either the trade being removed or the totem still being able to be traded, but it just transforms the totem item into air in the trade.

To replicate this, summon a villager that is selling a totem for any item, using the command below, and hold out the item it's selling, like the emerald using the command, then kill the villager and watch it use the totem. Now you can open its trading menu and see that the totem item has been replaced with air. I wouldn't expect it to be like that and would expect a different outcome or even having the villager not able to use the totem. But I guess this is what happens if you perform these very specific steps.

`/summon minecraft:villager ~ ~ ~ {VillagerData:`

```
{type:plains,profession:farmer,level:2}  
,Offers:{Recipes:[{buy:  
{id:emerald,Count:1}  
,sell:{id:totem_of_undying,Count:1}}]},Health:1,Attributes:[{Name:"generic.max_health",Base:1f}]}
```
