

Increase villages generate in versions after 1.10

MC-152966 Village system

Status	Resolved / Fixed
Affected	Minecraft 1.14.1, Minecraft 1.14.2 Pre-Release 4, 1.16.1
Fixed in	21w40a
Reported	2019-05-25

STEPS TO REPRODUCE

1. Launch Minecraft 1.10.
2. Create and load a world using the seed ``-7273534702661314127``.
3. Open the generated world in Amidst and count the villages shown for the seed.
4. Record that approximately 32 villages are present.
5. Launch Minecraft 1.14 and create a new world using the same seed, ``-7273534702661314127``.
6. Open the 1.14 world in Amidst and count the villages shown for the seed.
7. Record that approximately 82 villages are present.
8. Observe that the same seed generates substantially more villages in 1.14 than in 1.10.

OBSERVED BEHAVIOUR

In Java Edition, worlds generated with the same seed contain substantially more villages in versions 1.11 through 1.14 than in 1.10. For seed `-7273534702661314127`, the reported comparison shows 82 villages in 1.14 compared with 32 in 1.10, while seed `5324560665388954678` produces 92 villages in 1.14 compared with 31 in 1.10. The increased village density is especially noticeable in desert biomes, where villages appear to generate unusually frequently. This difference can be observed by generating the same seeds in 1.10 and in a later version from 1.11 through 1.14 and comparing the resulting maps with a tool such as Amidst.

EXPECTED BEHAVIOUR

Villages should generate at a similar frequency and overall density in versions 1.11 through 1.14 as they do in version 1.10 when using the same seed. The number of villages should not increase dramatically, and desert regions should not become disproportionately crowded with villages. Comparable seeds should produce broadly consistent village counts and distribution across these versions.

ENVIRONMENT

Minecraft Java Edition Versions: 1.14.1, 1.14.2 Pre-Release 4, 1.16.1

ORIGINAL DESCRIPTION

Villages spawn rate since 1.11 to 1.14 is like an infestation.

here are some examples

Seed : `-7273534702661314127`

1.14 : 82 Villages

1.10 : 32 Villages

Seed : `5324560665388954678`

1.14 : 92 Villages!

1.10 : 31 Villages

(small note : i noticed that villages density in deserts especially have top of the roof spawn rate :

to get this glitch load a world in 1.10 and use the same seed in 1.11 to 1.14 and you will notice the difference in villages. Admist is a great program to see the difference easily.

hopefully i have provided enough information for this bug to be fixed once and for all, and thanks for the support
